

ASPECTS OF HUMAN CONSCIOUSNESS

25 January 2020|Knowledge & Education, Spirituality & Natural Law, Truth & Freedom

"Heed these words, you who wish to probe the depths of nature. If you do not find within yourself that which you seek, neither will you find it outside of yourself. If you ignore the wonders of your own house, how do you expect to find other wonders? In you is hidden the treasure of treasures. Know thyself, and you will know the universe, and the gods." - Oracle of Delphi

There are three questions we need to address when it comes to human consciousness;

The "What", the "Why" and the "How".

What is human consciousness?

Consciousness is our ability to recognise what is going on within us and around us. It's our ability to recognise patterns, and it is our ability to tell truth from deception.

Truth is simply that which is. It is the events and occurrences that are taking place, and have taken place in the world around us, and within us.

Unfortunately what most people perceive to be the truth, is not actually the truth. Perception is not reality. Perception is formed by the ideas and belief systems that have been given to us by those who want to control us, to keep us from seeking and finding the real truth.

We suffer, because our perception is out of alignment with truth. If we wish to end suffering, we must bring our perception into harmony with truth; that which is.

Most people remain ignorant of the truth, because the truth is a destructive and painful process. It means having to step outside of the illusion, and come to terms with the fact that life is suffering, and that we are heading toward hell on earth. We have the ability to turn it into heaven instead, but for that to happen, we must evolve in consciousness.

(I deliberately choose the word "ignorant" to describe humanity's state toward the truth. Ignorance means, not knowing, even though the information is available. It means you are choosing to ignore the truth.)

"The matrix is a system. That system is our enemy. When you are inside the system, what do you see? Businessmen, teachers, lawyers, carpenters....the very minds of the people we are trying to save. But until we do, these people are still part of that system, and that makes them our enemy. You have to understand that most of these people are not ready to be unplugged. Many of them are so enured, so hopelessly dependent on the system, that they will fight to protect it." - Morpheus, The Matrix

In the posts that follow we will endeavour to unveil the real hidden Truth. We will endeavour to unveil the knowledge that has been hidden from humanity. The knowledge that has been hidden to keep us under control. The controllers know and understand this knowledge. In order for us to free ourselves from the control system and level the playing field, we need to know the truth.

The next question we need to address is "Why?"

Why do we need to raise our consciousness? Why do we need to end the control system?

The simple answer to this question would be; "So that we can end suffering on earth." But most people are unaware of their suffering because they don't know the truth. They live in ignorance. Life is an illusion. It is difficult to know freedom when all you have known, your entire life, is slavery.

"You are here because you know something. What you know, you cannot explain, but you feel it. You felt it your entire life.....that there is something wrong with the world. You do not know what it is, but it's there...like a splinter in your mind, driving you mad. It is this feeling that has brought you to me. Do you know what I am talking about?"

The Matrix.

Do you want to know what it is? The matrix is everywhere. It is all around us, in this very room. You can see it when you look out your window, when you go to church, when you turn on your television, when you go to work, when you pay your taxes. It is the wool that has been pulled over your eyes, to blind you from the truth.

What truth?

That you are a slave, Neo. Like everyone else you were born into bondage, born into a prison that you cannot smell or taste or touch. A prison for your mind. Unfortunately no one can be told what the matrix is. You have to see it for yourself." - a conversation between Morpheus & Neo, The Matrix

The final question we need to address is, "How?"

If we are suffering, and the only way to end the suffering is to raise human consciousness, then how do we go about doing this?

First we must desire the truth. The answers and solutions are out there and are simple. But we must be willing to seek it first. The desire for truth must be present.

The next requirement is knowledge. We need to know how we work and how the world around us works. We need to know the workings of the human psyche, our history and origins, natural law, human consciousness, and what it means to be moral.

Next, we must go through the process of coming to a true understanding of the knowledge we have acquired. To know something is not the same as to truly understand it. Knowledge gives us the "what". Understanding gives us the "why". We will discuss this more in future posts.

Finally, we must take action. We must act in alignment with truth and natural law. This is the meaning of true wisdom. Wisdom is not simply knowing and understanding. Wisdom is achieved when we apply what we know and

understand in our lives. It requires action. Wisdom is not to know the path.
Wisdom is to walk the path.

The three aspects of human consciousness are our thoughts, emotions, and actions.

Our thoughts are the creative energy. Everything must exist in the mind first.

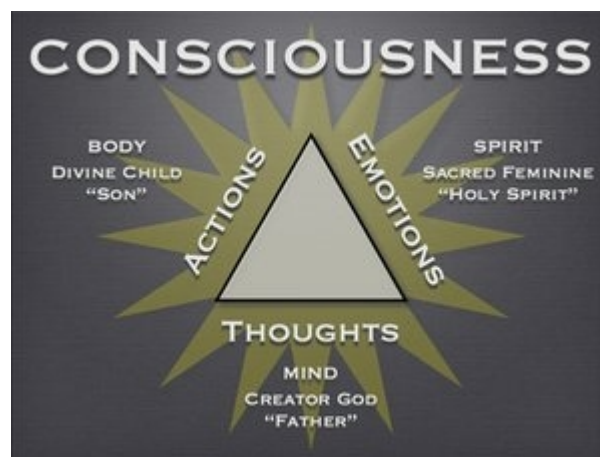

The universe is mental. This is our creator, or "father" essence.

Our emotions is our intuitive energy, the energy of true care and compassion. It is the feminine or mother aspect, and our "spirit" essence.

Our actions are the result of bringing our thoughts and our emotions together. It is the "son" essence. It is the energy that is required for change. It is our Will.

This is the true Holy Trinity of the biblical allegory.

(An allegory is a story, poem or picture that can be interpreted to reveal a hidden meaning, typically a moral one.)

So to conclude; in order for us to end suffering on earth, we need to raise our collective consciousness. For this to happen we must desire the truth. Then know and understand what is going on within us and around us, what natural law is and how it works, and what it truly means to be moral. Finally, we need to align our behaviour with truth, natural law and true morality.

This is what I will be sharing in the posts to come.

To be continued...
